DETAILED ACTION

Claims 1-14 are pending in this application filed 11-08-00.

Applicant's claims are directed toward elastomer-free, high efficacy antiperspirant stick compositions.

DOUBLE PATENTING

16.

Claims 1-14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 10/037,216. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant as well as the referenced application are claiming a high efficacy stick antiperspirant/deodorant free of added stearyl alcohol and comprising in weight percent based on the total weight of the composition components (a)-(e) in the same amounts and proportions. The referenced application is claiming an additional component (f). Applicant's use of the open terminology "comprising" does not exclude the additional component (f). The instant application is broad enough to encompass the claims of the referenced application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

17.
